一. Listen to the conversation and choose the best answer for the questions below.

1. (1) 【答案】B

【解析】 Hello, my dear friends. I'm Wang Hui. Today, I'm here to share my studying experience with you.

When I was in Grade 7, I worked hard but made very little progress. That made me worried. I almost gave up studying. Later, my teacher talked with me about my problem and gave me some advice. I followed it. Oh, amazing! It worked. Now, let me tell you about it.

First, we should have enough sleep at night. It makes a fresh brain.

We can remember things clearly and quickly. Good sleep also makes good health, and good health helps us study better.

Then, we must find out our best time to study. For me, it is in the morning. But my classmate, Zhang Pan, studies best at night. He thinks he can have a good review with longer hours at night.

Finally, we should communicate with others. It makes us feel relaxed.

I hope it will help you. Thank you!

二. Listen to the beginning of a debate about homeopathy. Write Siobhan Cooper (SC) or Dr. Winston (DW) for each opinion.

4. (1) 【答案】SC

【解析】考查细节理解。根据 SC 举的咖啡因的例子，用极少量咖啡因引发人体的防御系统，从而降低压力感。故选 SC。

Host: In today's debate, we'll be discussing homeopathic medicines. First, we'll hear from Siobhan Cooper, who is in favour of homeopathy. Ms Cooper, could you define homeopathic medicines for us, please?

SC: Of course. Homeopathic medicines contain tiny amounts of active substances, which in larger amounts would cause a problem. If a person is suffering from stress, for example, a homeopathic treatment containing typically stress-inducing coffee can actually help them. The body senses the coffee in the medicine, but the amount is so small, and the body's defense reaction so strong, the overall effect is a reduction in stress. It's a powerful principle.

Host: Dr. Winston, you are not a supporter of homeopathy. Could you tell us what you think of Ms Cooper's statement?

DW: Thank you. Well, this sounds simple, but again and again experiments show that homeopathic medicines are placebos. A placebo is a false medicine that does nothing. When scientists test a new medicine, they give half the people in the test a placebo — often a sugar tablet — so that they can see if the real medicine actually works. Ms Cooper mentioned that

homeopathic medicines contain tiny amounts of active substances, but she didn't say just how tiny. One popular homeopathic medicine, for example, is made from pure water!

Host: Ms Cooper?

SC: First of all, I've heard these arguments many times before. Scientists don't yet understand exactly how homeopathy works, but that doesn't mean it's wrong. Millions of people around the world benefit from homeopathy, but people like Dr Winston only complain about it.

DW: Scientists do understand homeopathy, as I've just explained. Homeopaths make extraordinary claims about their placebo medicines because it's a good way of making money. This is a multi-million dollar industry, which sells sugar and water at ridiculous prices and takes money from people who need real medical help. It is extremely dangerous...

Host: Wow... strong opinions from both sides there...

Siobhan Cooper is a registered homeopath. She gives presentations about homeopathy and runs homeopathic training courses. Dr. Charles Winston is a member of a regional doctors' association. He also works as a consultant for large pharmaceutical (制药的) companies.

4. (2) 【答案】DW

【解析】考查细节理解。根据 DW 所说 A placebo is a false medicine that does nothing. 可知，安慰剂只是让患者以为是真药，是心理作用。故选 DW。

(1) 15 minutes/ fifteen minutes

(2) Get everything ready/ Get everything done/ Get things ready/ Get things done

(3) collecting books

(4) simple

(5) parents and children/students and parents

【解析】The first morning of the school year is very important. I am glad to tell you some good tips. These tips will help you and your children have a good start. First, get up early. On the first day back to school, starting fifteen minutes earlier is necessary. Then you and your children can have enough time to get things ready. Second, get everything done before going to bed, such as choosing clothes, doing homework, collecting books and other things. Help your children if they need. Third, don't have breakfast in a hurry. Ask kids what they want to eat for breakfast the night before and plan out breakfast ideas. A simple breakfast is enough.
