(1) 【答案】F

【解析】 Why is the number "one" such as a bad number? It is because when the date has this number in it, some bad thing always happens. Let me give you some examples. At the midnight of Sep 21st, 1999 in Taiwan, the earthquake was very horrible. That night, more than two thousand people died in that accident. Many houses collapsed and the mountain moved.

America was once attacked by terrorists on September 11 in 2001. The terrorists crashed into America's buildings with airplanes. The terrorists used airplanes to hit many tall buildings in America.

When the airplanes hit the tall buildings, the tall buildings and the airplanes exploded. 3201 people died and 6291 were injured. How terrible that was! I think the terrorists were crazy. People say that the American emergency number is 911, so the terrorists chose September 11 to attack America. There was a big typhoon on July 11 still in 2001 in Taiwan. Many cities were flooded. Some people died because of landslides. These dates all contain the number "one". I really don't think "one" is a good or lucky number. So we have to be careful on dates with this number.
